

U.S. Embassy Dakar, Senegal
Routine Message for U.S. Citizens
March 26, 2014

Dakar will again face a water outage starting Thursday, March 27, 2014 and lasting until Saturday, March 29, 2014 as SDE, the water utility, works on the next stage of the permanent repair to the main water line to Dakar. According to water company authorities, the shutoff is part of their master repair plan and the water will be shut off in order to allow technicians the opportunity to seal and paint the repairs that took place during the fall.

The embassy advises taking the following measures:

- Please stock up on drinking water. It is also recommended that you fill buckets and bathtubs prior to Thursday to ensure additional water capacity at your residence.
- Please conserve water by not washing cars or watering lawns. In addition, please limit all other types of water usage such as laundry, toilet flushing, and shower times.

As noted in the October 28, 2013 message related to the most recent water shut-off, being mindful of health issues is also advised if the outage lasts longer than SDE has planned.

- The Embassy Health Unit advises using only bottled or distilled water for brushing your teeth, cooking, and cleaning fruits and vegetables.
- When eating out, you should stay away from leafy greens or anything raw. Consider fully-cooked proteins and fried foods instead.
- If you have a water distiller, check it nightly as debris can keep it from working properly.
- If you are experiencing symptoms of vomiting, diarrhea, or nausea, please seek medical attention.
